The date of submission of the article: February 6, 2014

The name and address of the institution from which the work originated

This work was a collaborative project between the University of Toronto, the Cameroon Baptist Convention Health Board SEEPD program, and the Bamenda Coordinating Centre for Studies in Disability and Rehabilitation.

Funding sources: We gratefully acknowledge that funding for this study was provided to the BCCSDR by the CBCHB SEEPD Program, which is in turn funded by AusAID through CBM Australia. The BCCSDR supplemented the completion of the analysis of the study and the writing of the report through financial and in-kind support.

Acknowledgments

We are grateful for the assistance of Mr. Julius Wango, of the Centre for Inclusion Studies, (previously the Bamenda Coordinating Centre for Studies in Disability and Rehabilitation) and the research assistants who worked very hard in difficult conditions to gather the information. We also acknowledge the interest and support of the local authorities in this project.
