High Quality Research with Impact on Clinical Care

About Health Research in Africa

JOURNAL SCOPE

Health Research in Africa (HRA) is an open source, peer reviewed medical journal that is affiliated to Health Sciences and Disease, the official publication of the Faculty of Medicine and Biomedical Sciences of the University of Yaoundé I. HRA covers all aspects of medicine, pharmacy, biomedical and health sciences, including public health and societal issues. However, HRA values mostly pertinent research articles with impact on clinical care or public health.

It is an “online first” publication, which means that all the publications articles appear on the website before being included in the print journal. The papers are published in full on the website, with open access. Our mission is to inform and educate all the health professionals and to promote constructive debate on health issues that matter in the management not only of diseases but of health as a whole.

Acceptance of manuscripts is based on the originality, the quality of the work and validity of the evidence, the clarity of presentation, and the relevance to our readership. Publications are expected to be concise, well organized and clearly written. Authors submit a manuscript with the understanding that the manuscript (or its essential substance) has not been published other than as an abstract in any language or format and is not currently submitted elsewhere for print or electronic publication.

EDITORIAL POLICIES

HRA's Publications Policy Committee follows the recommendations of the International Committee of Medical Journal Editors (ICMJE), the World Association of Medical Editors (WAME), and the Committee on Publication Ethics (COPE) for guidance on policies and procedures related to publication ethics. The policies for HRA have been adapted from those three advisory bodies and, where necessary, modified and tailored to meet the specific content, audiences, and aims of HRA.

Manuscripts are initially checked by the editor in chief or section editor for identification of gross deficiencies. At this stage, the proposal may be rejected. After this initial screening, articles are sent to two-reviewers. The review process may take days to weeks to reach a decision. The duration from submission to publication may take one to six months (average: 2 months).

ARTIFICIAL INTELLIGENCE (AI) – ASSISTED TECHNOLOGY

At submission, the authors should disclose whether they used artificial intelligence (AI)-assisted technologies in

the production of the publication and how AI was used. However, authors should not list AI and AI-assisted technologies as an author or co-author, nor cite AI as an author.

ARTICLE PROCESSING CHARGES (APC)

Article submission is free of charges, but **if your paper is accepted for publication**, you will be asked to pay article processing charges to cover publications costs, depending on the type, complexity and length of the work, and on the **number of authors**

Inquiries about fast track, manuscript status and preparation, as well as letters to the editor, should be directed to:
